GLOBAL MEME CULTURE · COMMUNITY FINANCE · WEB3 ECOSYSTEM

Born from memes, forged through cultural consensus.

Born as a Meme. United by Culture.

October 2026 / Brand Strategy and Business Development Edition

00 / CONTENTS

Strategic Overview

From cultural branding and product operations to global market access, we are building a comprehensive commercial development ecosystem.

A neural frog, connecting the global community.

ONE FROG. ONE GLOBAL COMMUNITY.

Table of Contents for the Business Plan

01 Brand and Market	Executive Summary / Market Opportunities / Cultural Positioning / Customer Persona
02 Ecological Products	Five Key Ecological Engines / Product Pathways / Engagement Framework
03 Business Operations	Revenue Structure / Token Use Cases / Technical Capabilities / Fund Management
04 Growth Operations	Global Communication / Community Governance / Team Collaboration
05 Trading Market	Global Trading Market Coverage / Binance Alpha / Futures and Spot Listing Goals
06 Implementation	Implementation Roadmap / Key Performance Indicators / Risk Management / Publicly Available Information

BRAND DNA / CULTURE × COMMUNITY × ECOSYSTEM

This business plan is addressed to global cultural communities, business partners, creators, and ecosystem participants, providing a clear presentation of Froggie's strategic positioning, business structure, implementation roadmap, and market development objectives.

01 / EXECUTIVE SUMMARY

executive summary

FROGGIE: A global meme community brand rooted in Eastern internet culture.

Froggie draws its spiritual foundation from the neurofrog culture, utilizes the BNB Chain as its on-chain asset network, and leverages its global community as the cornerstone for long-term growth. The brand integrates content creation, digital identity, interactive entertainment, community collaboration, and commercial partnerships into a unified ecosystem, thereby establishing a growth trajectory that spans cultural dissemination, user engagement, and commercial operations.

The project has established an on-chain circulation foundation on the BNB Chain, achieved listing on exchanges including MEXC, LBank, and Bitget, and will enter the Binance Alpha market in September 2025. In its next strategic phase, the project will continuously advance its original IP ecosystem, global community network, digital products, and transparent governance, thereby developing the capability to submit listing applications for both Binance Futures and Binance Spot.

BNB CHAIN	1B FROGGIE	ALPHA
Public Chain Infrastructure	Total token supply	Market Stage

Three Core Growth Levers

Cultural potential

The clear visual recognition capabilities of the neural frog, combined with the context of Eastern social culture, establish a distinctive entry point for international communication.

User Network

With creators, players, and community organizers as key participants, we aim to establish long-term, multilingual, and cross-regional engagement relationships.

Products and Revenue

Establish a sustainable operational framework centered on content, digital identity, entertainment, and brand partnerships.

Market Channels

Facilitate access to international trading platforms by leveraging real-world usage data, transparent token structures, and compliant governance frameworks.

Born from memes, nurtured within communities, and evolving into a global cultural brand.

CULTURE FIRST. COMMUNITY ALWAYS.

02 / MARKET OPPORTUNITY

Market Opportunities

Web3 community consumption and digital cultural expression are shaping new avenues for brand operations.

Culture has become the common language of digital communities.

Memes, short videos, digital avatars, and online interactions are continuously reshaping how users connect. Memes inherently offer low barriers to sharing, strong visual recognizability, and the potential for cross-lingual remixing; Web3, in turn, provides communities with publicly verifiable participation records, as well as a foundation for the circulation of digital assets and collaborative governance.

Three Core Requirements

Cultural expression

Users express their identity and stance through their roles, slogans, and visual content, thereby fostering social dissemination.

Community belonging

Participants look forward to ongoing interaction, the recording of their contributions, and a community with a publicly defined direction for development.

Digital Experience

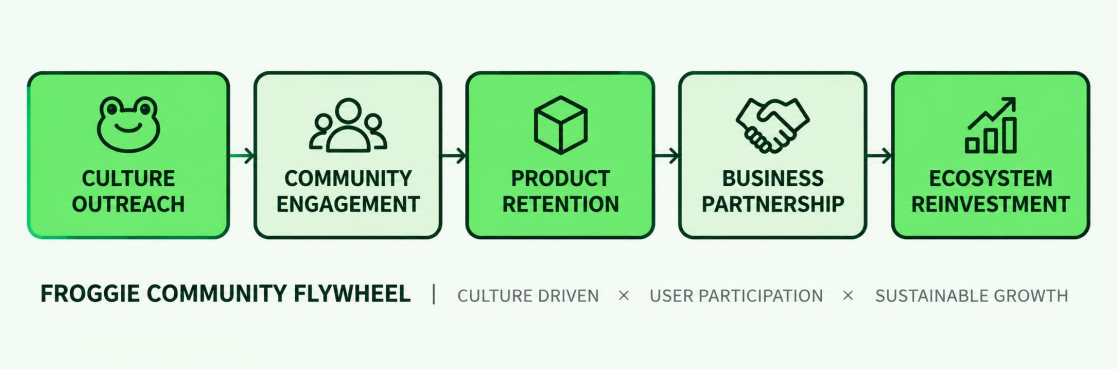

Lightweight content products, interactive games, digital souvenirs, and service benefits constitute the actual user needs.

Brand Connection

Cultural brands aim to establish more direct and dynamic consumer connections through their creator communities.

Froggie's business positioning

Froggie employs an operational framework consisting of "cultural outreach — community co-creation — product retention — digital consumption — ecosystem reinvestment." Cultural content establishes user awareness, digital products foster sustained engagement, and commercial partnerships generate operational revenue to support ecosystem development and content investment.

03 / BRAND POSITION

brand positioning

Build long-term brand recognition through a distinct cultural identity.

Born as a Meme. United by Culture.

Born from memes, forged through cultural shared understanding.

Brand Mission · Mission

Enable the "Neuro-Frog" culture, originating from the Eastern internet scene, to transcend language and regional boundaries, connecting global meme culture enthusiasts through original expression and open collaboration.

Brand Vision · Vision

Become a Web3 digital cultural brand with international cultural influence, sustained creative capacity, genuine user engagement, and robust commercial operational capabilities.

Brand Personality · Personality

WEIRD / Unique

Preserve the distinctive traits of humor, absurdity, and lightheartedness to establish a memorable expressive framework.

FREE / Freedom

Encourage personalized expression and open creativity, enabling users from diverse cultural backgrounds to participate freely.

OPEN / Open

Content collaboration, community rules, and key information shall be based on openness and transparency.

BUILT / Co-construction

Creators, users, and partners work together to drive brand growth and product evolution.

Brand Identity System

Standardize the use of FROGGIE for English text recognition and "Neuro 蛙" for Chinese communication naming; retain bright green, dark forest green bold outlines, concise hand-drawn icons, and a lighthearted, humorous content tone. The project's commercial visual identity system shall establish independent original assets and licensing management guidelines.

04 / AUDIENCE STRATEGY

Target Audience and Competitive Differentiation

Leverage a sense of cultural belonging to drive brand communication, and harness ecological engagement to foster customer retention.

Four key target audiences

Global meme enthusiasts

Cultivates an interest in community culture, trending online topics, and role-based communication; actively engages in content discussions and community expression.

Original content creator

Specializes in visual design, video production, motion graphics, music composition, or comic creation, consistently delivering impactful and shareable works.

Web3-native users

Proficient in wallets, on-chain interactions, and digital cultural products; focused on asset security and transparent information.

Brand and Ecosystem Partners

Partnership opportunities for organizations seeking original content, community events, digital merchandise, and cross-regional marketing capabilities.

Differentiated competition strategy

Froggie's brand distinctiveness stems from the combination of "Eastern social cultural DNA × an easily shareable frog character × on-chain community engagement." Its brand strategy does not rely on single trending opportunities; instead, it extends its reach through continuous creative output, cultural events, and digital products.

value proposition

cultural identity	**sense of participation**	**Continuous Experience**	**brand value**

We offer ordinary users an accessible experience for cultural engagement; provide creators with opportunities for exhibition, collaboration, and partnership; and offer business partners operable cultural brands and global community outreach platforms.

05 / PROJECT FOUNDATION

Existing Infrastructure of the Project

On-chain public circulation, listing records on mainstream trading platforms, and Binance Alpha market activities together form the foundation for market development.

BEP-20	1,000,000,000	BscScan
Asset Network	Maximum supply	On-chain query

Key events that have occurred

June 2025 · Cultural Naming and Dissemination

WeChat's official X account launched an interactive poll centered on the English name "Froggie," and "Froggie" has since become a widely adopted English nickname.

2025.09 · Binance Alpha

Binance has officially released an announcement regarding the FROGGIE Alpha trading event, detailing the event schedule for this token on Binance Alpha.

BNB Chain · On-chain Circulation

The contract address of FROGGIE has been disclosed; market data and transaction records can be accessed via an on-chain browser and a price tracking platform.

Community Channels · Content Distribution

The project now has X and Telegram as social channels, providing public platforms for community operations and cultural dissemination.

Token identification information

project	information
Token Name	Froggie（FROGGIE）
Associated public chain	BNB Smart Chain
Token Standards	BEP-20
Maximum supply	1,000,000,000 FROGGIE
Contract address	0xA45F5EB48CeCd034751651aeeda6271Bd5df8888

06 / GLOBAL MARKET ACCESS

Global trading market coverage

Publishing listing records across multiple platforms establishes the foundation for Froggie's global market reach and asset liquidity.

3 CEXs	Binance Alpha	PancakeSwap V3
Official Listing Announcement	Official trading activities	On-chain spot market

Publicly disclose milestones related to listing and trading market

trading platform	Launch Date	Transaction Integration	Verifiable market progress
MEXC	2025.06.30 / 09.17	Meme+ · Innovation Zone Spot Market	Initially launched in Meme+; later upgraded to the FROGGIE/USDT Innovation Zone spot market.
LBank	2025.09.06	Spot · Perpetual Contracts	FROGGIE has launched spot trading of USDT and announced the launch of USDT-denominated perpetual contracts.
Bitget	2025.09.10	Innovation Zone · Meme Zone	FROGGIE/USDT spot trading has officially launched, now open to international users.
Binance Alpha	2025.09.20	Alpha · Wallet Trading	Binance has officially announced the FROGGIE Alpha trading competition and token incentive event.
PancakeSwap V3	On-chain market	DEX · FROGGIE/WBNB	The BNB Chain trading pool establishes an on-chain channel for autonomous trading and price discovery.

The ecological value of market coverage

Global User Reach

By leveraging the historical token listing records and on-chain trading channels of multiple centralized exchanges, they have established market touchpoints tailored to users with diverse trading preferences.

Evolution of the mainstream market

Starting from Binance Alpha's phased market milestones, we will continuously enhance the quality of real-world trading, project transparency, and Futures/Spot application capabilities.

Market Description

The above records reflect the historical cryptocurrency listings and market accessibility on the trading platform; however, they do not represent the platform's investment in, cooperation with, or guarantee of returns for any specific project. Binance Alpha is distinct from Binance Spot or Binance Futures; MEXC's FROGGIE perpetual contract was delisted on October 4, 2025. Real-time trading availability is subject to the official trading pages of each respective platform.

Official Announcements & Market Sources: MEXC Listing / MEXC Innovation Zone / LBank / Bitget / Binance Alpha / CoinGecko / Removal from MEXC Futures Trading

07 / ECOSYSTEM ARCHITECTURE

Five Key Ecological Engines

Enable cultural dissemination, user engagement, product experience, and commercial operations to grow together.

01 / MEME STUDIO | Global Cultural Creation Center

A global hub for original content, encompassing emojis, short videos, animations, character stories, artistic co-creation, and creator support.

02 / FROGGIE ID | On-chain Digital Identity System

A wallet-linked community identity system that generates digital badges, contribution profiles, and participation records.

03 / GLOBAL GUILD | Global Community Alliance

A multilingual community network encompassing regional activities, volunteer collaboration, creator communities, and localized content.

04 / FROGGIE WORLD | Digital Interactive Entertainment Ecosystem

A digital interactive entertainment space featuring casual games, digital souvenirs, character experiences, and online events.

05 / FROGGIE DAO | Community Collaboration and Governance Framework

A transparent issue collaboration and community governance platform that encompasses public proposals, discussions, voting, and disclosure of public affairs.

06 / BRAND PARTNERS

Bridge the gap between brands, IP creators, and commercial entities to drive licensing partnerships, cultural marketing initiatives, and offline product offerings.

Principles of Ecological Development

Adhere to the following implementation sequence: "prioritize lightweight products, prioritize content, adopt community-driven approaches, and ensure commercial sustainability." For all products, measurable usage metrics, designated maintenance personnel, and safety boundaries shall be established, while avoiding redundant feature proliferation and token incentives lacking genuine user demand.

Culture aggregates traffic; products fulfill demand; and commercial revenue enables further innovation.

08 / MEME STUDIO

Froggie Meme Studio

Transform the visual and emotional expressions of the neural frog into sustainably produced cultural content assets.

product mix

Creation Tools and Asset Library

Establish unified standards for roles, expression templates, brand fonts, visual components, and guidelines for the use of design assets.

Global Creative Activities

We continue to launch emoji challenges, short-video feature campaigns, original comic submissions, and community art exhibitions.

Creator Growth Framework

Create a portfolio page, partnership opportunities, creative archives, and professional domain tags.

Content distribution channels

Standardize the content distribution cadence across X, Telegram, short-video platforms, the official website, and cultural events.

capax negotii

The Content Center fulfills three core functions: brand communication, community engagement, and commercial partnerships. The copyright and scope of use of all creative works are governed by the creation agreement; once explicit authorization is obtained, the brand may conduct secondary brand dissemination, event showcases, commercial collaborations, and merchandise development.

Performance Indicators

New Releases This Month	Actual interaction rate	Creator Retention	Content Conversion

The operational effectiveness of the content ecosystem is measured by the number of original works, the number of contributing authors, the quality of content dissemination and user engagement, and the volume of conversions from brand collaborations.

09 / IDENTITY & GUILD

Froggie ID × Global Guild

Establish long-term relationships between digital identities and global community collaboration.

Froggie ID: Tracking community participation

By leveraging wallet connectivity, voluntary community identities are established to record activities such as content creation, event participation, volunteer collaboration, and product usage. These digital identities embody honors, historical contributions, and eligibility for event participation, thereby creating a traceable community archive.

Global Guild: Building an international community network

Establish a unified activity organization mechanism tailored to diverse language communities. Core initiatives include localized content production, online themed events, urban cultural gatherings, creator collaborations, and synergies with ecosystem partners; continuous operations are ensured through the public disclosure of activity plans and systematic quality feedback mechanisms.

Community Operations Standards

Standardize brand communication, content guidelines, administrator conduct standards, anti-fraud alerts, and campaign review procedures.

Contribution logging mechanism

Document verifiable original works, event organization, and public services, and avoid measuring contributions based on headcount or transaction volume.

Multilingual services

Develop foundational bilingual content in Chinese and English, and expand to other languages based on the needs of real-world communities.

Regional Cooperation Network

Establish cross-regional co-creation and collaboration scenarios by engaging creators, event organizers, and developers.

Every Voice Matters. Every Creation Counts.

Respect every form of expression and value every piece of creation.

10 / WORLD & GOVERNANCE

Froggie World × DAO

Enhance user retention through interactive experiences, and establish a trustworthy community framework via transparent governance.

Froggie World: Digital Cultural Experience

We are developing a lightweight digital interactive space centered around the "Neuro-Frog" character, featuring web-based mini-games, expressive interactions, cultural themed events, digital collectibles, and character collection experiences. Our product design adheres to principles of ease of use, low entry barriers, and shareability, prioritizing the fulfillment of genuine entertainment and community needs.

Froggie DAO: Community Collaborative Governance

Establish a governance framework comprising issue identification, open discussion, community voting, and implementation disclosure. For financial-related issues, impose higher review thresholds and multi-signature approval rules. All governance activities shall be documented in publicly accessible records, thereby safeguarding participants' right to information and right to expression.

Interactive product

A digital cultural experience featuring lightweight games, character content, community activities, and sustainable updates.

Governance Process

Proposal submission, discussion cycle, result disclosure, implementation accountability, and regular progress reporting.

Security Permissions

Implement tiered access controls, multi-signature management, and comprehensive operational records for key contracts and fund transactions.

User Protection

Clarify the boundaries for wallet authorization prompts, anti-phishing education, privacy protection, and content governance.

11 / USER LIFECYCLE

Customer Journey and Ecosystem Growth Closed Loop

From my first encounter with the neural frog to becoming a long-term participant in this cultural phenomenon.

Five-stage user lifecycle

stage	User Experience UE	Project Operational Objectives
find	View role-related content, original videos, and community interactions	High-quality organic dissemination
add	Join our official community to learn about our brand and ecosystem.	Safety Guidance and First Participation
partake	Create content, participate in activities, and use interactive products	Increase participation frequency and improve retention
contribute	Access public contribution records and participate in community collaboration	Enhance organizational capabilities and creative output
joint development	Participate in long-term product development, commercial partnerships, and community governance.	Establish a stable community and consistent brand revenue streams

Community Growth Flywheel

Users join the community through content, where high-quality interactions foster social relationships; creators continuously produce content; digital products extend user dwell time; and commercial revenue, in turn, supports both the platform and cultural activities. Authentic user experiences and transparent operations steadily strengthen community trust.

User growth stems from cultural resonance; long-term retention stems from genuine value.

12 / BUSINESS MODEL

Business Model and Revenue Structure

With content brand management as the core strategy, establish a multi-source, sustainable cash flow model.

The Four Key Commercial Revenue Drivers

IP and Brand Licensing

Original character asset licensing, joint content production, product co-brands, and digital cultural content collaborations.

Digital goods and services

Themed digital souvenirs, paid creator tools, membership-based content services, and exclusive interactive experiences.

Commercial Marketing and Events

Brand-themed events, community culture collaborations, offline exhibitions, and digital communication solutions.

Creator Services Network

Copyright licensing matchmaking, original content customization, creative task management, and brand event execution services.

Principles of Value Distribution

Commercial orders generate verifiable operating revenue, which is prioritized for covering content production, product development, legal licensing, user services, and operational costs. The project implements clear cost allocation and revenue disclosure mechanisms to establish long-term, sustainable fund utilization discipline.

From free distribution to paid experiences

Content Reach	Community Engagement	Product Experience	Brand consumption	Repeat purchases

The community's foundational experience remains open, with commercialization achieved through original content licensing, value-added services, and brand partnerships. Fluctuations in the market price of the token shall not be included in sustainable operating revenue.

13 / TOKEN UTILITY

FROGGIE Token and Ecosystem Value

Using publicly available on-chain assets as the foundation, we connect community services through real-world applications.

FROGGIE	BNB CHAIN	1,000,000,000
token	network	Maximum Supply

Ecological Use Directions

Digital cultural consumption

Make the FROGGIE payment option available in scenarios involving the provision of digital goods, souvenirs, and community services.

Cultural interactive activities

Use tokens for compliant cultural activities, content experiences, and specific digital rights scenarios.

Community Public Services

Establish appropriate participation mechanisms within transparent community service frameworks and digital identity systems.

Participation Mechanism for Governance

Establish governance rules for agenda items in accordance with law, ensuring community participation through clearly defined authorities, deliberation procedures, and disclosure mechanisms.

Token Economy Discipline

Current supply data for circulating tokens are presented via publicly accessible on-chain and market records. All actions involving contract upgrades, fund authorization, liquidity management, asset transfers, and incentive payments are subject to public disclosure, explicit authorization, and security review.

FROGGIE does not make fixed return promises, does not treat secondary market price gains as part of its ecosystem operating revenue, and prohibits the use of inflated metrics, fraudulent transactions, referral-based profit guarantees, or artificial market manipulation in its community activities.

14 / TECHNOLOGY & SECURITY

Technical Architecture and Digital Security

Build Web3 product infrastructure that features low entry barriers, is auditable, and operates sustainably.

Four-tier architecture

Architecture Layer	Core Components	Delivery Objectives
Cultural Content Layer	Brand official website, Content Center, Creator Tools	Unified Communication and Content Experience
Community Identity Layer	Wallet integration, participation records, digital badges	A trusted community identity system
Interactive Application Layer	Lightweight games, digital souvenirs, event systems	Enhance user engagement and product retention
On-chain service layer	BNB Chain, contract calls, permission management	Public Data and On-Chain Asset Circulation

Technical Safety Standards

Contracts and Fund Security

Professional audits shall be completed prior to the deployment of smart contracts; fund transactions shall adhere to multi-signature authorization, least privilege principles, and maintain public records.

Users and Data Protection

The scope of explicit authorization for wallet connectivity shall be clearly defined; user information shall adhere to the principles of minimal data collection, tiered access, and secure storage.

Stability and Operations & Maintenance

Establish monitoring alerting, anomaly rollback, service backup, and security incident handling workflows.

Transparency and Disclosure

Regularly disclose project progress, key wallets, fund management, and major governance matters.

15 / GO TO MARKET

Global Growth and Brand Communication

Unify visual identity, content operations, and multilingual communities to establish sustainable growth capabilities.

Global Market Communication Pathways

Chinese Cultural Community

Deepen the neural frog culture ecosystem to connect users of native expression culture with Web3 content creators.

International Meme Community

Leverage an English-language content matrix, creative challenges, collaborative interviews, and lightweight interactive products to expand international reach.

Regional Creators Network

Establish a high-quality cultural production network through sustained content initiatives, regional activities, and collaboration in local languages.

Brand Commercial Partnership

Develop quantifiable and deliverable collaborative projects centered on original content, co-branded initiatives, and interactive experiences.

Content Matrix and Annual Communication Theme

The brand's content strategy revolves around four long-term pillars: Froggie Daily (emoticons and short videos), Froggie Stories (character narratives), Froggie Creators (original creators), and Froggie World (ecosystem experiences). A unified creative calendar ties together online discussions, product updates, and community cultural activities.

One Frog. One Global Community.

A neural frog, connecting the global community.

16 / OPERATIONS & FINANCE

Operational Framework and Financial Discipline

Establish a traceable cost management system, a accountability framework, and commercial performance metrics.

Core Operations Team

Brand and Cultural Center

Responsible for original character development, content production, creator partnerships, and brand collaborations.

Product and Technology Center

Responsible for digital applications, the official website, identity systems, infrastructure, and security operations and maintenance.

Global Community Center

Responsible for multilingual communities, event execution, user feedback, and growth operations.

Legal and Compliance & Finance Center

Responsible for commercial licensing, auditing, risk control, contract approval, and operational disclosure.

Annual Resource Allocation Framework

Budget Section	Primary Scope of Expenditures
Products & Technology	R&D, infrastructure, security testing, user experience optimization
Content and Creators	Original production, author services, brand assets, and content distribution
Global Community	Localized operations, online and offline activities, and customer service
Legal and Compliance	Legal counsel, audit services, intellectual property, and information governance
Operational Reserve	Emergency funds, operational and maintenance support, and long-term business continuity

The operational financial statements separately disclose revenue, costs, cash balances, contractual funds, and community public funds; the project employs a system comprising budget approval, fund authorization, payment review, and periodic accounting records.

17 / EXCHANGE AMBITION

Binance's Strategy for Listing Futures and Spot Assets

We have secured market access for Binance Alpha and are actively advancing our strategic goals to list Binance Futures and Binance Spot.

01 / ALPHA · Existing Foundation

FROGGIE appeared at the Binance Alpha official event in September 2025, completing its initial market debut.

02 / FUTURES · Phase Objectives

We will enhance the depth of real trading, market integrity, global community engagement, as well as compliance documentation and security capabilities, and formally advance the listing application for Binance Futures.

03 / SPOT · Long-term Goals

Advance Binance Spot's listing application by leveraging sustained product usage, a transparent and open token structure, mature community governance, and robust operational capabilities.

GLOBAL / MARKET ACCESS

Continuously develop international trading services and user engagement capabilities to enhance brand visibility in global digital asset markets.

Beyond Alpha. Toward Global Markets.

Building on Alpha, we are expanding into global mainstream markets.

Both the listing of Binance futures and spot assets are part of the project's strategic objectives. The decision to list will be made independently by Binance; the actual launch date and available trading pairs shall be subject to Binance's official announcements.

18 / LISTING READINESS

Listing Work Framework

Submit a formal application supported by product information, transaction quality, organizational compliance, and publicly available data.

Six Core Delivery Tasks

Project due diligence documentation

Prepare a comprehensive set of documentation, including project overview, technical architecture, development records, operational team profiles, legal documents, and brand rights documentation.

Security and Contract Report

Complete third-party code audits, fund access authorization lists, disclosure of key wallets, and security response plans.

Market Quality Governance

Establish genuine liquidity, reasonable trading spreads, and a robust trading structure, while eliminating artificial volume manipulation and market manipulation.

Community and operational data

Disclose the number of independent active users, usage of interactive products, creator participation, regional growth, and commercial revenue.

Governance and Financial Transparency

Define team roles, business decisions, community proposals, budget approvals, fund management, and governance execution records.

Official listing application

The project lead shall submit the application via the official application channels of Binance Futures and Spot, and participate in the review process in accordance with the platform's requirements.

Exchange Development Principles

The project does not impose rigid listing thresholds that have not been publicly disclosed by the exchange, nor does it use descriptors such as "Binance-recognized," "guaranteed listing," or "upcoming announcement" in its external communications. Instead, the project builds market trust and fulfills listing requirements through its actual business performance.

19 / EXECUTION ROADMAP

Strategic Implementation Roadmap (2026-2028)

Define phase progress based on project delivery outcomes, and measure strategic advancement through delivery quality.

2026 Q4	**Brand Foundation Upgrade** Standardize the brand image and ensure consistency with the official website information; complete the development of contract-related security materials, official channels, project descriptions, and content matrices.
2027 H1	**Community and Product Launch** Launch the original content center and the first phase of digital identity; establish global creator initiatives and multilingual operational mechanisms.
2027 H2	**Further deepening of the commercial system** Drive the development of interactive entertainment products, cultural activities, original content licensing, and brand commercial partnerships, and establish operational business reports.
2028	**Upgrading of the international market** Deepen ecological applications, refine governance frameworks and listing due diligence documentation, and advance the work related to achieving listing goals for both Futures and Spot products.

At each stage, there are deliverable products, measurable users, and publicly available business outcomes.

20 / PERFORMANCE DASHBOARD

Growth and Operational Indicator System

Use real-world data to demonstrate the sustainable growth of the brand, its users, and its products.

Business Dimension	Key Metrics	management objectives
brand communication	Natural reach, interaction quality, and content sharing	Continuously foster organic communication
Creator Ecosystem	Original works, number of ongoing submissions, author retention	Establish a stable content supply
Community Network	Actual active users, event participation, and regional coverage	Enhance the quality of long-term participation
Digital products	Active users, feature utilization, retention, and revisit rates	Create a reusable product experience
Commercial revenue	Authorized revenue, service revenue, and cross-selling from partnerships	Generate sustainable operating cash flow
Tokenization and Markets	Position distribution, trading depth, bid-ask spreads, and trading integrity	Enhance market quality and transparency
Security Governance	Audit coverage, risk mitigation, and completeness of disclosures	Ensure the security of users and project assets

Operational management cadence

weekly

Publish data on product iterations, community activities, and key content, and collect user feedback.

monthly

Disclose user growth, content production, product usage, and key security considerations.

every quarter

Update progress on commercial operations, fund utilization, ecological restoration, and strategic milestones.

Annually

Release the brand development report, ecosystem achievements, and key development priorities for the next fiscal year.

21 / RISK & GOVERNANCE

Risk Governance and User Protection

Protecting user rights and interests, safeguarding brand reputation, and ensuring business continuity constitute the fundamental prerequisites for long-term development.

Intellectual Property Management

Establish original image rights documentation; third-party emojis, trademarks, content, and artworks must obtain commercial use licenses.

Smart Contract Security

Implement independent audits, access controls, multi-signature management, security drills, and incident response.

Integrity in the trading market

Strictly prohibit artificial order placement, false transactions, insider information dissemination, and unauthorized listing promotions.

Compliance and Market Access

Product operations shall comply with the regulatory requirements of the applicable jurisdictions; marketing authorization applications shall be submitted directly by the core project members.

User Privacy and Funds

Minimize the collection of personal information, and clearly display wallet authorization, anti-fraud alerts, and asset risk information.

Commercial operational capability

Sustain the long-term operations of the project through diversified revenue streams, prudent budgeting, and consistent product delivery.

Principle of Openness and Transparency

This project does not guarantee fixed token yields, does not assure price appreciation, and does not characterize the listing of Binance contracts or spot tokens as a guaranteed outcome. All official listing information is released through the exchange's official channels.

Transparent. Responsible. Community-Driven.

Transparency, accountability, and long-term collaborative development.

22 / GLOBAL FUTURE

Global Vision and Business Outlook

Transform the neural frog from an internet cultural icon into a global digital cultural brand.

FROGGIE — Born as a Meme. Built for the World.

Rooted in culture, nurtured by shared consensus, and oriented toward the world.

Froggie bridges Eastern internet culture with the global Web3 community: leveraging original content to build cultural influence, utilizing digital products to meet user needs, employing commercial partnerships to support ecosystem operations, and adopting transparent governance to foster shared trust.

Looking ahead, Froggie continues to develop Meme Studio, Froggie ID, Global Guild, Froggie World, and its community governance framework, while expanding its international communication network and long-term commercial capabilities, thereby advancing the project toward its goals of listing on Binance Futures and Binance Spot.

Final Development Goals

Become a Web3 meme brand that combines distinctive cultural expression, authentic user communities, sustainable operational capabilities, and global market influence.

23 / PUBLIC INFORMATION

Publicly Available Information and Project Portal

Public announcements of the exchange, market quotes, project communities, and on-chain identification information.
